

NOW AVAILABLE IN NE!

NEW PUMPS GENERATION ELECTRICAL AUXILIARY WATER PUMP

Supports the coolant flow, especially at low engine speeds or in auxiliary heating mode.

Ensures coolant circulation even when the engine is not running. Ideal for automotive industry, cooling systems, marine, residential and commercial heating.

Advantages: prevents localised overheating and ensures efficient heating. A supplementary pump that specifically takes care of additional cooling requirements, while the normal water pump performs the main task of cooling the engine.

No.	NE No.	OEM No.	Application
1	194050000000	1K0965561J	Audi A3 VW Beetle, CC, EOS Jetta Seat Altea MPV
